# About xMooney Token

xMooney (xM) is a BEP-20 Token minted on Binance Smart Chain.

Through the xM Mining Network, we extract mining rewards from multiple Proof of Work blockchains bringing that value back to xM.

Our Martian Mining Community pulls together amateur to expert hobbyists with a common goal to educate, train, and guide each other into becoming better crypto miners.

Utilizing personal computers, laptops, and mining rigs to form a dedicated mining pool, we work collectively by increasing our hash power.

# Tokenomics

xMooney has a fixed supply of tokens mimicking a release schedule, as if it were a Proof of Work blockchain, like Bitcoin.

Halving cycles are events where scheduled xM tokens for release is reduced by 50%.

10% tax applied to each xMooney transaction.

- 7% Reflections distributed to xM holders
- 3% Directed to Tax Wallet

The 3% that goes into the Tax Wallet is used for purchasing mining equipment dedicated to increasing the value of xM on behalf of the xMooney community.

**Max Supply:**  
21 Billion

**Subunit:**  
1 Token = 1 Billion Techs

**Cycle Duration:**  
9 Months

## Halving Cycles: Every 4 Cycles

# Project Design

xMooney was inspired by the values, characteristics, and structure of Bitcoin, Ethereum, HBAR and other blockchains.

Our goal is to provide a stable path for crypto miners to monetize their efforts while growing the collective hash rate.

The Martian Mining Pool sells the mined rewards in order to buy xMooney Tokens.

Reflections are triggered by Martian Miner payouts, benefiting all xM Token Holders.

## Miners

- Earn xM by contributing to the xMooney Mining Network
- Support multiple blockchains to ensure flexibility
- Build community to educate and support operations

## Holders

- Build a position through our fair market release schedule
- Automatically receive reflections based on xM holdings
- Influence development of xM expansion with governance

# Governance

We currently have in development our Governance and Voting system to ensure xMooney functions as a DAO (Decentralized Autonomous Organization).

We believe transparency is imperative in being unified with our community.

To evolve, the xMooney Network will entrust the people by presenting proposals whereby each xM Token represents one vote.

The DAO will work to facilitate improvements to benefit our collective growth and hash rate.

Our vision is to build a truly decentralized network of crypto miners from all backgrounds and experiences, uplifting communities through the shared value and market liquidity of xMooney Token.

As we move closer toward our goals, standing up our governance system, and expanding our mining network, xMooney will carry into the future as one of the leading cryptocurrencies backed by a global community.
