What is Mooney Coin

Mooney Coin is an ERC20 Token minted on the Ethereum Blockchain.

Mooney combines the mining rewards from multiple cryptocurrencies using personal computers and dedicated mining rigs in the community.

The mining rewards then buy Mooney Coin, which increases the value for holders and increases rewards for miners.

How the project works

Mooney Martian Pool

The Martian Pool sells the mined cryptos to buy Mooney tokens and increase the value for holders.

Mooney Martian Rigs

Building new Mooney Rigs lowers the time for the next cycle and temporarily lowers the price to create buying opportunities

Mooney Mining Crypto

Dedicated Mooney rigs and the community mine together in the Martian pool

Mooney Mining Wallet

Purchased Mooney in the mining wallet is later sold back to fund the next Mooney Rig build
